

There is a large Christian community in the greater Rochester, New York, area, of which I and my family are a part. Our local K-Love station serves us by encouraging us in our faith and exposing us to Christian music from artists around the world.

We would greatly miss that encouragement to be a positive part of our local community if our K-Love station was replaced by a LPFM station providing different programming. K-Love serves the public interest by encouraging us and by exposing us to examples of other Christians in other areas of the country and world who are impacting their communities in a positive way.

Thank you for considering my comments and working to keep K-Love available around the country.
